INTERESTS

SUMMARY

Experienced Tech Lead and Frontend Developer skilled in leading and supporting teams, collaborating on technical decisions, and delivering modern frontend architectures. Comfortable taking ownership of both technical tasks and team guidance, with a focus on code quality, maintainability, and learning. Value open communication, collaboration, and ongoing improvement in both technical and team practices.

EXPERIENCE

Mindera · Connells

Frontend Engineer
2025/11 – present

Individual contributor on an internal AML and KYC compliance tool. Contributed across the full frontend stack — from BFF API integration and role-based access control to document management, PEP remediation flows, and case action workflows. Maintained code quality through peer reviews, unit testing, and authoring internal testing documentation and standards. Actively embraced AI-assisted development practices: configured GitHub Copilot agents with project-specific instructions and reusable skills, and used AI tooling throughout daily development for code generation, review, and documentation.

TypeScript · React · Next.js · Vitest · React Testing Library · GitHub Copilot

Mindera · Burberry

Tech Lead
2021/06 – 2025/11

Tech Lead and active developer across multiple teams (typically 2–8 developers and 1–2 QAEs), working on a variety of projects for Burberry. Supported the team in technical decisions and solution design, with a focus on maintainability, quality, and reliable delivery. Helped define roadmaps, manage requirements, and coordinate dependencies within the team and with stakeholders. Contributed to team support and monitoring activities, using tools like New Relic for alerting and observability; created and updated runbooks to assist support teams.

- **Content MFE** · Lead & Contributor — Modular web application interfacing with multiple APIs and integrating analytics, marketing, and A/B testing providers. Used ContentStack as the CMS for the editorial engine.
  TypeScript | React | Next.js | Express | CSS | Emotion | GraphQL | REST | ContentStack
- **Appointment Booking** · Supporting Lead — Integration of Qudini into the existing stack to enable appointment bookings in Burberry stores. TypeScript | React | Next.js | Qudini
- **CMS Integrations** · Supporting Lead — Development of small serverless services to automate CMS tasks such as bulk updates, translations, metadata creation, and sitemaps.
  TypeScript | AWS Lambda | AWS EventBridge
- **Content360 / Search360** · Supporting Lead — Development of a subgraph service within an Apollo Router supergraph.
  TypeScript | Node.js | NestJS | Apollo Router | GraphQL

Mindera · Farfetch

Frontend Lead Developer
2019/10 – 2021/06

Led a team of 4 developers and 1 QAE to evolve Farfetch's internal CMS tool, improving content/component management for a global ecommerce platform. Oversaw technical architecture and roadmap planning.

TypeScript | React | Next.js | Express

Mindera · Farfetch

Frontend Developer
2017/11 – 2019/10

Developed ecommerce web apps delivering projects for 7+ global brands. Integrated with proprietary CMS and multiple APIs.

React | Redux | Styled Components | PostCSS
